

**Current report No. 54/2023**

**Date:** 12 November 2023

**Subject:** Concluding an agreement for a new project

**Legal basis:** Article 17 Section 1 of the MAR

**Report content:**

The Management Board of PCF Group S.A. with its registered office in Warsaw (the “**Company**” or the “**Issuer**”) informs that after analyzing the market, production capacity and resources of the Company’s capital group, it has decided on the realization of the new project under the code name “Bison”. Thus, on 12 November 2023 the Company entered into, with Incuvo S.A. with its registered office in Katowice (“**Incuvo**”), a subsidiary of the Issuer, a development services agreement for the production of the aforesaid project.

Project “Bison” involves the production of a video game in the survival adventure genre, based on the own intellectual property rights of the People Can Fly group, designated for the most recognizable virtual reality (VR) platforms of the current and future generations.

The production of the VR game will be financed entirely by the Company. As part of the production process, the Company, as an entity with the adequate experience, competence and infrastructure, will be responsible for the production of the final product, which will be a VR game completed to the extent that it can be used by players, and for its commercialization, including release to the market.

The development of the VR game will be carried out using the Unity graphics engine.

The launch of the game is planned for 2024-2025.
